

Project Initialization and Planning Phase

Date	16 August 2026
Team ID	Individual
Project Title	India's Agricultural Crop Production Analysis
Maximum Marks	3 Marks

Project Proposal (Proposed Solution)

This project proposal outlines a solution to address a specific problem. With a clear objective, defined scope, and a concise problem statement, the proposed solution details the approach, key features, and resource requirements, including hardware, software, and personnel.

Project Overview	
Objective	To analyze India's agricultural crop production from 1997–2021 using Tableau.
Scope	To analyze production based on state, crop, season, area, and year using interactive visualizations.
Problem Statement	
Description	The agricultural dataset is large and difficult to analyze using raw data.
Impact	It is difficult to identify production trends and compare states, crops, and seasons.
Proposed Solution	
Approach	Collect, clean, and preprocess the dataset, then create Tableau visualizations, dashboard, and story.
Key Features	9 visualizations, KPI cards, India map, interactive filters, dashboard, data story, and Flask web integration.

Resource Requirements

Resource Type	Description	Specification/Allocation
Hardware		
Computing Resources	CPU/GPU specifications, number of cores	e.g., 2 x NVIDIA V100 GPUs
Memory	RAM specifications	e.g., 8 GB
Storage	Disk space for data, models, and logs	e.g., 1 TB SSD
Software		
Frameworks	Python frameworks	e.g., Flask
Libraries	Additional libraries	e.g., scikit-learn, pandas, numpy
Development Environment	IDE, version control	e.g., Jupyter Notebook, Git
Data		
Data	Source, size, format	e.g., Kaggle dataset, 10,000 images
