

Data Collection and Preprocessing Phase

Date	Aug 18, 2026
Team ID	Individual
Project Title	India's Agricultural Crop Production Analysis
Maximum Marks	2 Marks

Data Collection Plan & Raw Data Sources Identification

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

Data Collection Plan Template

Section	Description
Project Overview	This project analyzes India's agricultural crop production from 1997 to 2021 using data related to states, districts, crops, seasons, cultivated area, production, and yield. The project uses Tableau to transform the agricultural data into visualizations, a dashboard, and a story to identify trends, compare agricultural performance, and understand production patterns across different dimensions.
Data Collection Plan	The data for this project was collected from a single primary agricultural crop production dataset covering India from 1997 to 2021. The dataset was obtained in CSV format and contains 345,407 records with 10 attributes. It includes information related to State, District, Crop, Year, Season, Area, Area Units, Production, Production Units, and Yield-related data. This dataset was used as the primary source for analysis and visualization in Tableau.

Raw Data Sources Identified	One primary raw data source was identified for the project: India's Agricultural Crop Production Analysis (1997–2021) Dataset. The dataset provides historical agricultural information for different states, districts, crops, and seasons in India and is used to analyze cultivated area, production, and yield over the period from 1997 to 2021.
